STOP TRACKING!

NO-MARK Your Solution Provider for Difficult Printing Applications for Over Two Decades

How can I print clean screens and heavy solids easily on gloss paper, plastic and synthetic stocks without worry about ink marking? Use proven 'No-Mark' products. Reduce paper waste and earn more money on every run - day after day. Available for all sheet-fed presses, superior 'No-Mark' products have a 6-month unconditional Satisfaction Guarantee or your money back.

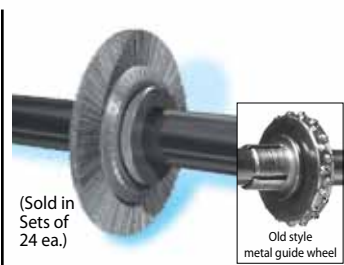

NO-MARK
Starwheels
For All Sheet-Fed Deliveries

Longtime favorite of press operators worldwide. Adjustable anti-track components for every situation. Full cylinder option (below) gives you a cleanable and much more effective alternative to nets.

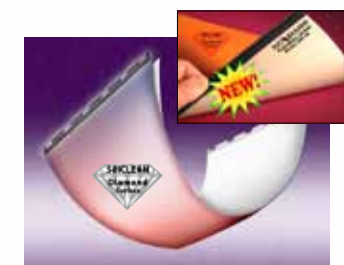

NO-MARK
SiliCLEAN™ Surface
For All Transfer Cylinders

The longest life anti-track films available. Replace nets with a long lasting, cleanable product! Offered with your choice of application options, including 'No-Mark's' unique repositionable adhesive that makes installation fast and very easy.

NO-MARK
StarBrushes™
For Multi-Bar Deliveries

Replaces old style metal or plastic guide wheels. Thin-faced soft natural hair bristles repel ink and provide a "Floating Kiss" to text weight stocks. A longtime favorite of Heidelberg K & S series owners.

NO-MARK
PressBoss™ Jackets
For Heidelberg Presses

Featuring the 'No-Mark' Diamond Surface, PressBoss Jackets are perfect retrofits. Easy to mount, pre-packed to OEM specifications, crash-resistant cellular foam back. Outlasts most any anti-track surface available.

Noteworthy Products...

Man Roland Air Drum retrofits, Miehle/Nebiolo Quick-Set replacements, Chute systems for thermographers, Baum Folder Guide Brush Wheels. Just a few of the anti-marking products 'No-Mark' has developed over the years. If you have marking you cannot stop, give us a call.

• 6-Month Jacket Warranty
• Low Replacement Cost
With E-Z TOUCH FASTENING (Velcro® Brand Hook & Loop)
**Full Cylinder Option
For All Sheet-Fed Deliveries**

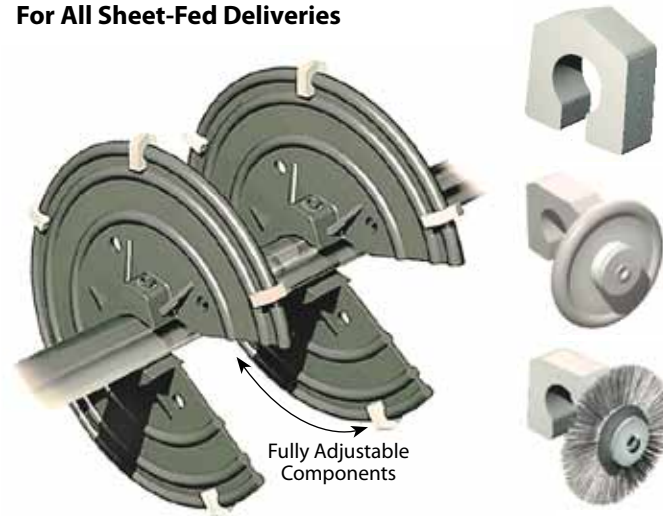

No need for a permanent cylinder! Long-life, semi-rigid, self-forming SiliCLEAN™ jacket goes on and off of your 'No-Mark' wheels in a snap. Easy 5-minute install on any press.

Less Waste
More Green...
with SiliCLEAN®

NO-MARK®
Starwheels™
For All Sheet-Fed Deliveries

Fully Adjustable Components

'No-Mark' TEFCLEAN Feet

Used primarily for running text weight gloss stocks with line copy. Sometime used in conjunction with Brush Wheel components to alleviate tail slap.

'No-Mark' TEFCLEAN Wheels

Gives you the ability to run up to 28 pt. coated board with ease. Free-spinning wheel made from proprietary TEFCLEAN runs the heavy weights clean and trouble-free.

'No-Mark' BRUSH Wheels

Soft thin-faced natural hair brush wheels repel ink and provides the famous 'No-Mark' 'Floating Kiss' to all text weight coated papers, synthetic and plastic stocks.

Every 'No-Mark' set comes with main wheels. Depending upon press size and model, the main wheels are either machined from molded 30% glass-filled nylon, or are fabricated from steel and aluminum. These parts simply replace the OEM wheels that were supplied with the press or, in some cases, the squirrel cage delivery mechanisms that many presses come equipped with. The fully adjustable anti-track components fit all 'No-Mark' wheels, giving you complete versatility in your pressroom.

NO-MARK®
Full Cylinder Option
For All Sheet-Fed Deliveries

Special industrial grade VELCRO® V-Clip Hold-Down components keep the loop backed jackets firmly in place

The Full Cylinder Option uses the same main wheels outfitted with special components that hold a semi-rigid SiliCLEAN jacket. This forms a non-marking delivery cylinder that you can put on and remove easily. Unlike nets, the SiliCLEAN surface lasts much longer, is cleanable, and change-out takes only seconds.

Jon Lantz
A-1 Printers
"One of the best decisions I've made! We were up and running free of marks in a remarkably short time."

Starwheel Pricing, Options, Spare Parts

12 to 19 Inch Press Sheet Size

- Two Main 'No-Mark' Wheels
 - 16 ea. TEFCLEAN Feet
 - 12 ea. 'Soft Kiss' Brush Wheels
 - 12 ea. TEFCLEAN Wheels
- Package Price: \$385**

19+ to 36 Inch Press Sheet Size

- Two Main 'No-Mark' Wheels (All Metal Construction)
 - 16 ea. TEFCLEAN Feet
 - 12 ea. 'Soft Kiss' Brush Wheels
 - 12 ea. TEFCLEAN Wheels
- Package Price: \$985**

36+ to 40 Inch Press Sheet Size

- Three Main 'No-Mark' Wheels (All Metal Construction)
 - 32 ea. TEFCLEAN Feet
 - 24 ea. 'Soft Kiss' Brush Wheels
 - 24 ea. TEFCLEAN Wheels
- Package Price: \$1295**

Over 40 Inch Press Sheet Size

- Four Main 'No-Mark' Wheels (All Metal Construction)
 - 48 ea. TEFCLEAN Feet
 - 36 ea. 'Soft Kiss' Brush Wheels
 - 36 ea. TEFCLEAN Wheels
- Package Price: \$1795**

Spare Components:

- TEFCLEAN Feet** (16 per Pkg)
Order# TF-016, \$20
- TEFCLEAN Wheels** (12 per Pkg)
Order# TW-012, \$55
- BRUSH Wheels** (12 per Pkg)
Order# BR-050, \$65
- V-Clip Hold-Downs** (10 per Pkg)
Order# V-Clip, \$65

It's easy to have Full Cylinder Anti-Tracking once you have 'No-Mark' Wheels. To determine pricing please note the following.

In most all cases, except for some of the large press models, one set of the V-Clip Hold-Down components will accommodate 2 'No-Mark' wheels. Price per set is \$65.

For presses with cylinders over 14" wide, another main wheel, in addition to what is noted in the column to left, will be needed for jacket support. Additional wheels, when purchased for the Full Cylinder Option, are \$230 ea.

Although the jackets are constructed differently, price is equivalent to column 3 of our transfer cylinder material. If your specific press model is not listed, locate price based on nearest press sheet size. Jackets are sold two per package, and are fabricated using our standard grade SiliCLEAN.

See column 3 back page.

You can purchase the Full Cylinder Option without the component parts if you like. To determine price simply subtract [spare] component costs from **Package Price** at left.

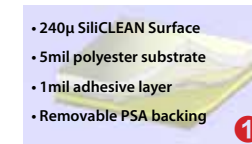

Examples, For RYOBI/ITEK Model 3304:

You already have the 'No-Mark' component package. You need to order:
• One set V-Clip Hold-Downs, \$65
• Two SiliCLEAN jackets, \$65 ea. x 2
Total Price: \$195

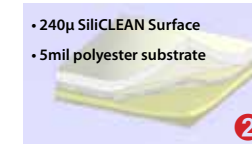

You want just the Full Cylinder Option. Order:
• Two main wheels, \$245 (found by deducting \$140 total component cost from \$385)
• One set V-Clip Hold-Downs, \$65
• Two SiliCLEAN jackets, \$65 ea. x 2
Total Price: \$440

NO-MARK®
SiliCLEAN™ Surface
For All Transfer Cylinders

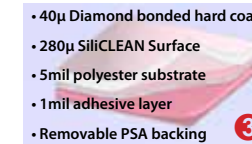

'No-Mark' SiliCLEAN provides top-of-the-line anti-marking performance in demanding transfer cylinder applications, including UV coating. Manufactured under strict quality parameters, its remarkable on-press longevity is the result of a proprietary manufacturing process that produces an ultra-strong bond between the working surface and substrate. This makes SiliCLEAN a surface that can be cleaned when necessary with mild press washes. Regular use of our SA610 Conditioner/Cleaner is also recommended.

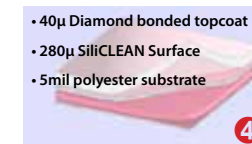

SiliCLEAN Standard Surface with Repositionable Adhesive Back
Most popular. Easy to install and easy change-over due to a unique adhesive that makes it like an aggressive Post-It® note. No adhesive remains on cylinder when removed. Overall gauge less than 0.008"

SiliCLEAN Standard Surface with Plain Back
The same working surface as above, however you choose your own mounting preference. Double-backed tape or spray adhesive are two that are commonly used. Overall gauge less than 0.008"

SiliCLEAN Diamond Surface with Repositionable Adhesive Back
Longest lasting. The extraordinary hard coat over the SiliCLEAN provides outstanding performance and extends working life 4x over the standard surface. Overall gauge less than 0.011"

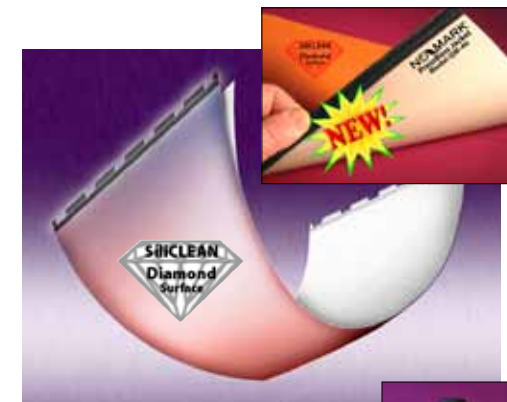

SiliCLEAN Diamond Surface with Plain Back
The same working surface as above, however you choose your own mounting preference. Double-backed tape or spray adhesive are two that are commonly used. Overall gauge less than 0.011"

SiliCLEAN pricing is on back page.

NO-MARK®
PressBoss™ Jackets
For Heidelberg Presses

'No-Mark' PressBoss jackets are manufactured by combining Diamond surface SiliCLEAN with a durable closed-cell foam. This pressure bonded laminate is crash-resistant, and made exactly to packing specifications. It is an unsurpassed anti-track jacket material. Rugged mounting terminations are then added, also based on OEM specifications, for perfect fit and easy installation.

'No-Mark' SA610 SiliCLEAN Conditioner/Cleaner keeps your jackets and transfer covers in top notch condition. A quick wipe down with SA610 after long runs will ensure extended surface longevity.

The PressBoss jacket for the popular Heidelberg QuickMaster line was introduced after many larger press customers demanded it for their QM units.

Fred Paars
Pressroom Mgr
"After installing 'No-Mark' wheels on our Ryobi's with great success we tried the PressBoss on our Heidelberg. Now our press operators will not work without them."
